

# Assignment 3

Desmond Lottje

dl062

5012134

## Goal

I aimed for a sci-fi sound that fits the futuristic space station vibe of the game. I went for a more realistic feel for the sounds that could realistically happen in everyday life, like metal clanks and footsteps while adding more synthetic sounds for the fiction elements of the game like the gunshots.

## The Game Demo Licence

I downloaded the Game demo from the Godot Asset Library.

(<https://godotengine.org/asset-library/asset/2710>)

**License:** Creative Commons Attribution License version 3.0 (credits required)

**Engine Version:** 5.5.2 (Newer versions are incompatible)

## Downloaded Sounds

### Automation.mp3

**License:** Downloaded from opengameart.org

(<https://opengameart.org/content/automation-looping>) under CC4 License (credits required)

**Usage:** Used as main menu music (main\_menu\_loop.mp3)

### Murder on the Metrorail.mp3

**License:** Downloaded from opengameart.org

(<https://opengameart.org/content/murder-on-the-metrorail>) under CC4 License (credits required)

**Usage:** Used for ingame music (ingame\_music\_loop.mp3)

### 244230\_\_syntaxseed\_\_gas-torch-burn.flac

**License:** Downloaded from freesound.org

(<https://freesound.org/people/SyntaxSeed/sounds/244230/>) under CC0 License (no credits required)

**Usage:** Used for flying\_ship.mp3

**Usage:** Used for enemy\_robot\_explode.mp3

## Technical Implementation

I implemented Volume sliders in the Settings of the game. I also built an Audio Bus structure that includes ducking of music and less important sounds in favor of important sounds.
